Office Action Summary

Application No.

10/066,693

Applicant(s)

NAKAZAWA ET AL.

Examiner

Danny Nguyen

Art Unit

2836

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 July 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1,2,4-6,9-11,14 and 15 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 6,9-11,14 and 15 is/are allowed.
- 6) ☒ Claim(s) 1,2,4 and 5 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1, 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gadkaree et al (USPN 6,225,733) in view of Bendale et al (USPN 6,631,074).

Gadkaree discloses an electric double layer capacitor comprises electrodes (6 and 8), which include activated carbon powder (e.g. col. 3, lines 16-17), a binder for binding the activated carbon powder (e.g. col. 8, lines 1-11), an electrolytic solution (e.g. col. 3, lines 22-24, col. 8, lines 20-31), wherein a density of the electrodes is in range of 1.4 g/cm³ to 1.8 g/cm³ (col. 3, lines 13-14). Gadkaree does not disclose a particle size distribution of the activated carbon powder as claimed. Bendale discloses an electric double layer capacitor comprises a particle size distribution of the activated carbon powder is in the range of 2 micrometers to 20 micrometers (col. 8, lines 1-3). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified to activated carbon power of Gadkaree to incorporate the particle size distribution which has the above range as disclosed by Bendale in order to provide efficiently packing density (col. 8, lines 3-4).

2. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gadkaree et al in view of Bendale, and Andelman (USPN 6,127,474). Gadkaree and Bendale

disclose all limitations as discussed above in claim 1, but do not disclose the electrodes have the specific resistance as claimed. However, providing a capacitor with an electrode resistance of 1-10 ohm cm is well known in the art. Selecting the exact valued of the electrode resistance is based upon the design constraints imposed by the system in which the capacitor id designed to be used in. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have selected the specific resistance of electrodes of Gadkaree and Bendale to incorporate the specific resistance within 2-7 ohm cm based upon such design constraints because this is a known range of electrode resistance as taught by Andelman (col. 7, lines 21-23).

3. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gadkaree et al in view of Bendale, and Gan et al (USPN 6,171,729). The combination of Gadkaree and Bendale disclose a binder for binding the activated carbon particles, but do not disclose the binder as claimed. Gan discloses a double layer capacitor circuit comprise a binder that contains materials such as polyvinylidene fluoride (e.g. see col. 4, lines 14-20). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the binder Gadkaree and Bendale to incorporate the binder that contains materials such as polyvinylidene fluoride as taught by Gan in order to improve conductivity.

Allowable Subject Matter

4. Claims 6, 9-11, 14, 15, 17 are allowed.

Conclusion

Art Unit: 2836

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Danny Nguyen whose telephone number is (571)-272-2054. The examiner can normally be reached on Mon to Fri 8:00 AM to 4:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Sircus can be reached on (571)-272-2058. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
